<td>Nancy Doolittle &amp; Alan Shapiro</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Real-time web-based collaboration and resource management helps students to share their ideas and mentor others. Web 2.0 tools provide a wealth of creative applications to increase the opportunities for higher level thinking and interaction. In this session, attendees will explore a number of popular, free web collaboration 2.0 tools. (Need Computer Lab)</td>

<td><strong>Assessment Rubric for Critical Thinking (ARC)</strong></td>
<td>Jesse Coraggio</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>The Assessment Rubric for Critical Thinking (ARC) is global rubric template developed for the College to provide a snapshot view of how student learning is being affected by the critical thinking QEP initiative. It is designed to assess a variety of student projects from a critical thinking perspective. For example, students in a composition class may be asked to complete a paper on a specific topic. This ARC rubric template can evaluate the student’s use of critical thinking skills in the development of the paper as opposed to specifically evaluating the quality of student’s writing skills. The ARC rubric template is designed to be flexible enough to address a number of student project modalities including written and oral communications. This session will discuss the development of the ARC as well as the guidelines for the use of the assessment at the course level.</td>

<td><strong>Researching Quality RLOs</strong></td>
<td>Karen Fritch &amp; Greg Rabelo</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Learning activities can enhance a course’s interest for the students as well as encourage thinking about concepts in a more critical way. Reusable Learning Objects (RLO’s) are a way to enhance multiple courses to focus common learning. Participants will review guidelines for evaluating RLO’s and view some well known learning object repositories. They then will have the opportunity to record their findings and ideas for use in a database to be shared with other faculty. (Need Computer Lab)</td>

<td></td>
<td><strong>Clickers - Building Advanced Slides to Promote Critical Thinking</strong></td>
<td>Karen Hesting</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Knowing what you know and don't know focuses learning. Audience response systems or “clickers” give students an opportunity to participate in your lecture by expressing their own understanding of the material. In addition they receive frequent and immediate feedback. This session will focus on how to create a variety of activities for effective, active lectures, which incorporate clicker technology, allowing for students to think critically. (Need Computer Lab with TurningPoint installed)</td>
