

GAIN THE SKILLS YOU NEED TO BE A QUALIFIED MOBILE DEVICE REPAIR TECHNICIAN

Smartphones have become essential in our efforts to stay connected. With the average smartphone price being \$600, it makes sense to repair rather than replace them when possible. According to a recent IBISWORLD report "cellphone repair is now a \$4 billion industry and is growing at twice the rate of the economy."

The Cell Phone and Tablet Repair Program is a 5-week (40 hour) course with intensive hands-on labs to include:

- Cell Phone Repair Industry
- Mobile Network Topologies
- Operating Systems Fundamentals
- Repair Tools & Equipment Essentials
- Cell Phone & Tablet Component Basics
- ESD Awareness
- Disassembly & Reassembly Standards & Procedure
- Troubleshooting
- Visual Inspections & Quality Control
- Practical Repair Labs

In addition to one-on-one support from experienced instructors throughout the course students receive customized course materials and their own repair tool kit.

Students completing the course will have the skills necessary to repair smartphones and tablets, and will receive guidance regarding career and entrepreneurship options.
