*There are several types of course categories within the credit and non-credit system; prior to 1990-91, the headcount number for non-credit students represented an unduplicated count within each of the various non-credit course categories. Beginning 1990-91, the unduplicated headcount number represents an unduplicated count between all non-credit course categories. However there is still potential duplication between credit and non-credit, i.e., a student who takes both credit and non-credit courses is counted twice. Beginning Fall 2002 the total includes upper division students.

*Utilization ratios are calculated for rooms coded as 110 (general purpose classrooms), 120 (computer classroom), and laboratories coded 210 (non-vocational and vocational) in the Facilities Data Base. Room utilization is defined as weekly hours of room use; the standards are 40 hrs/week for classrooms and 30 hrs/week for laboratories. Space utilization is defined as weekly hours per student station; the standards are room occupancy rate equal to .60 and laboratory occupancy rate equal to .80.
